

11th February 2022

Don't forget Valentine's Day is on Monday!!!!

Spotlight on : Recycling fun

Imagine you're little and you're being told about these plastic water bottles that end up in the ocean, harming the fish living there for hundreds of years. Now instead, imagine you've just discovered that a plastic bottle doesn't need to turn into waste once empty.

You could use it to build your own cool bird feeder, or a miniature planter box, or so much more.

This is the reason why recycled crafts activities are our best allies in helping our little ones learn all about waste reduction and recycling. It's a way to help them discover all the fun they can have in giving old objects a new life and purpose. To be effective, they need to be particularly fun, creativity-stimulating, and easy to join in.

At Little Crackers we encourage our children to engage in junk modelling, using a collection of bits and bobs from our own recycling boxes. We prioritise this for the independent process and skills involved as much as for the final project, but here are some ideas you might want to try out at home.

Joke of the week:

What did one
blueberry say to
the other on
Valentine's Day?

*
"I love you
berry much."

Important Dates
and **INFORMATION**

Half Term (term time only children)
Monday 21st to Friday 25th February
